Introduction: XL Trade Trigger Spray Bottle Holder

The Fault

Lack of storage solutions available from factory options in commercial vehicles

Most commercial vehicles, van and camper conversions have limited storage solutions. They often come with the rear of the vehicle completely bare except from the MDF cladding on the inside of the shell.

Our Solution

Install X8R's universal trigger spray bottle bracket in under 5 minutes for a simple storage solution.

X8R's trigger spray bottle holder is the perfect solution for tradespeople such as mobile mechanics, detailers, cleaners, gardeners and landscapers etc. It holds up to 5 bottles, 3 in the main body and 2 hanging by the trigger.

The holder can be fitted with self-tapping screws for an easy installation in under 5 minutes. No power tools required.

The bracket could also be wall-mounted such as in garages, workshops, sheds etc. Please ensure you use suitable wall plugs (if necessary).

The bracket is made from 1.5mm thick black powder coated steel, a far superior material versus the inferior plastic other solutions which often break.

Compatibility

The bracket is compatible with all trigger spray bottles with a diameter of 90mm or less, such as AutoSmart detailing bottles and most other brands.

You Will Receive

1 x Trigger spray bottle bracket in black powder coated steel

Supplies

You will need:

- Screw driver
- 5 x Self tapping screws (we recommend 3.5x16mm)
- Spirit level
- Marker

Step 1:

Press the bracket against the wall you're fitting it to. Ensure it is level with a spirit level. Mark the holes with a pen.

Use a screwdriver to install the self-tapping screws (the size we recommend is under "supplies") into the holes. Please note that you will not be able to use an electric drill for installation for this bracket.

This completes the installation. If you need any further guidance on this install or would like to purchase the parts shown please call us on +44 01843 446643 or email us at sales@x8r.co.uk. Please also check out our instruction guide on YouTube. www.x8r.co.uk Installation is carried out at installers risk, if unsure please contact us or a professional, X8R Ltd cannot be held responsible for any adverse result of installing this product or any injuries caused by install, if in doubt ask a professional.
